

International Journal of Aerospace and Lightweight Structures

Volume 1

2011

Number 2

CONTENTS

Updating Computational Aeroelastic Models using Flight Flutter Test Data <i>S. Timme and K. J. Badcock</i>	157–178
Impact Resistant Behaviour of Lightweight Structural Elements <i>Muneeb Ali, Nelson Lam, Lihai Zhang and Emad Gad</i>	179–201
Analysis of Non-Linear Vibrations of Single-Layered Euler-Bernoulli Beams using Wavelets <i>Jan Awrejcewicz, Olga A. Saltykova, Maxim V. Zhigalov, Peter Hagedorn and Vadim A. Krysko</i>	203–219
An Experimental Study of Stall Hysteresis of a Low-Reynolds-Number Airfoil <i>Hui Hu, Zifeng Yang, Hirofumi Igarashi and Matthew Martin</i>	221–238
Dynamic Analysis of Deployment and Retrieval of Tethered Satellites using a Hybrid Hinged-Rod Tether Model <i>Rui Zhong and Z. H. Zhu</i>	239–259
On the Impact Behaviour of Sandwich Panels with Various Cellular Cores <i>H. Zhao, H. B. Zeng, I. Elnasri and Y. L. Li</i>	261–281
Computational Analysis of Supersonic Flexible Parachute using Immersed Boundary Method <i>Xiaopeng Xue and Yoshiaki Nakamura</i>	283–299
Numerical Analysis of Unsteady Aerodynamics for High-Speed Trains <i>Liu Jiangtao, Lu Jingjing, Chen Gang and Li Yueming</i>	301–313
Knockdown Factor based Imperfection Sensitivity Analysis for Stiffened Shells <i>Bo Wang, Peng Hao, Kai-Fan Du and Gang Li</i>	315–333
