

International Journal of Aerospace and Lightweight Structures

Volume 2

2012

Number 3

CONTENTS

Bi-Stable Composite Laminates Induced by Vibration of Piezoelectric Film Actuators <i>Atsuhiko Senba, Tadashige Ikeda and Tetsuhiko Ueda</i>	299–315
Analytical Approximations to Nonlinear Vibration of a Clamped Nanobeam in Presence of the Casimir Force <i>A. R. Askari and M. Tahani</i>	317–334
On the use of Differential Transformation Method for Free Vibration Analysis of Euler-Bernoulli Beams with General Elastically End Restraints <i>Nuttawit Wattanasakulpong and Variddhi Ungbhakorn</i>	335–352
Experimental Study on Hot Bending of Ultra High Strength Steel 22MnB5 and its Lightweight Application <i>Hu Ping, Ying Liang, Guo Runqing, He Bin, Liu Wenquan and Guo Wei</i>	353–364
Topological Sensitivity Analysis of Structural Sound Radiation in a Thermal Environment <i>Xiongwei Yang, Gang Chen and Yueming Li</i>	365–382
Vibration and Dynamic Stability Analysis of a Functionally Graded Timoshenko Beam on Pasternak Elastic Foundation <i>S. C. Mohanty, R. R. Dash and T. Rout</i>	383–403
Free Flexural Vibration Studies on Skew Plates <i>C. V. Srinivasa, Y. J. Suresh and W. P. Prema Kumar</i>	405–420
