

International Journal of Aerospace and Lightweight Structures

Volume 3

2013

Number 4

CONTENTS

Prediction of Interlaminar Stresses of an Unsymmetric Cross-Ply Laminate Using Layerwise and Higher-Order Equivalent Single- Layer Theories <i>Hamidreza Yazdani Sarvestani, Ali Naghashpour and Mohammad Heidari-Rarani</i>	419–444
Effects of Active Damping on Parametric Instability of Composite Cylindrical Shells Using Piezo Fiber Composites <i>Partha Bhattacharya, Debabrata Podder and Atanu Sahu</i>	445–471
Hybrid Modification of Epoxy Resin with Micro-Fibrillated Cellulose and Rubber Nanoparticle: Effects on the Mechanical Properties of Carbon Plain-Weave Reinforced Composites <i>Andrea Betti, Valter Carvelli, Toru Fujii and Kazuya Okubo</i>	473–486
Study on the Quasi-Static Indentation Behavior of Al Foam <i>Xinzhu Wang, Xianghe Peng and Shan Tang</i>	487–502
Optimal Production Process of Particulate Intermetallic Compound Reinforced Aluminium Metal Matrix Composites <i>Yongbum Choi, Junichi Murakami, Takahiro Motoyama, Kazuhiro Matsugi, Kenjiro Sugio and Gen Sasaki</i>	503–512
Assessment of Induced Potential Effects on the Performance of Piezoelectric Beam Finite Elements <i>Litesh N. Sulbhewar, P. Raveendranath</i>	513–530
The Design of Aerospace Structure by Explosive Loading <i>Jong-Woong Lee, Cheol-Won Kong and Young-Shin Lee</i>	531–538
Numerical Analysis of Air Flow Past the 2415-3S Airfoil for an Unmanned Aerial Vehicle with Internal Propulsion System <i>Luis Velazquez-Araque, Luis D. Mendoza, Jiří Nožička and Jesus Casanova</i>	539–549
