<i>Preface</i>	v
<i>Organising Committee</i>	vii
<i>Contents</i>	xi
<i>Alfredo Ang Lecture</i>	xxv
MS01 Computational Methods and Applications for Stochastic Engineering Dynamics	
Dynamic Analysis of Steel Hall Exhibiting Some Mechanical Uncertainties <i>R. Bredow, and M. Kaminski</i>	1 – 6
Survival Probability of Nonlinear Oscillators Subject to Combined Periodic and Stochastic Excitation <i>Rongyue Zhu, Wei Lv, Yuanjin Zhang, and Fan Kong</i>	7 – 12
Active Learning Framework for Estimating First-Passage Probability of Stochastic Wind-Excited Structural Systems <i>J. Kim, S. Yi, and J. Song</i>	13 – 17
Dynamic Response and Reliability Analysis of Long-span High-pier Rigid Bridge Subjected to Multi-support and Multi-component Ground Motion <i>Zixin Liu, Zhangjun Liu, and Xinxin Ruan</i>	18 – 21
Response of an MDOF Nonlinear System with Constraints Under Combined Deterministic and Non-stationary Stochastic Excitation <i>P. Ni, V. C. Fragkoulis, F. Kong, I. P. Mitseas, and M. Beer</i>	22 – 26
Stochastic Response Analysis of a Piezoelectric Harvesting Device Subjected to Non-stationary Wind Loading <i>G. D. Pasparakis, V. C. Fragkoulis, F. Kong, and M. Beer</i>	27 – 33
Failure Probability Estimation, a Short History: Concepts and Misconceptions <i>K. Breitung</i>	34 – 39
First-passage Probability Estimation of Stochastic Dynamic Systems by a Parametric Approach <i>Chen Ding, Chao Dang, Matteo Broggi, and Michael Beer</i>	40 – 46

Time-variant Reliability Analysis for High-dimensional Nonlinear Systems Under non-white Excitation based on the Globally-evolving-based Generalized Density Evolution Equation <i>Meng-Ze Lyu, and Jian-Bing Chen</i>	47 – 51
Stochastic Process Generation from Relaxed Power Spectra Utilising Stochastic Harmonic Functions <i>Marco Behrendt, Marius Bittner, and Michael Beer</i>	52 – 58
MS02 Data-driven Inverse Methods for Uncertainty Quantification	
Comparison of State of the Art Sampling-based Bayesian Updating Techniques <i>M. B. Dodt, M. Kitahara, M. Broggi, and M. Beer</i>	59 – 66
On-line Bayesian Model Updating and Model Selection of a Piece-wise Model for the Creep-growth Rate Prediction of a Nuclear Component <i>Adolphus Lye, Alice Cicirello, and Edoardo Patelli</i>	67 – 74
MS04 Digital Methods in the Lifecycle of Infrastructure Systems to Enhance Reliability of Operation	
Machine Learning Techniques for Intelligent Life Cycle Management <i>Y. Varabei, L. Lapidus, and T. Braml</i>	75 – 82
Obtaining Data from Concrete Structures <i>J. Wimmer, and T. Braml</i>	83 – 90
Drone-based Acquisition of as-built Models for the Automation of Processes within the Digital Management of Bridge Assets <i>F. Kaufmann, T. Tschickardt, and C. Glock</i>	91 – 98
Formulation and Comparison of Maintenance Strategies using BIM-based Life Cycle Analyses <i>M. Müller, T. Zinke, and T.Ummenhofer</i>	99 – 105
Computing Characteristics for the Availability of Paths and its Application to a Communication Network <i>H.Schäbe, and S. Grüter</i>	106 – 110
A Framework for Data and Structural Integrity Management for Support Structures in Offshore Wind Farms Based on Building Information Modelling <i>L. Eichner, P. Gerards, R. Herrmann, R. Schneider, F. Hille, and M. Baeßler</i>	111 – 117
DigiPark–Digitization in Parking Garage Maintenance <i>C. Blut, and J. Blankenbach</i>	118 – 124

MS05 Life-cycle Reliability of High-Speed Railway Structural System

- An Effective Method for Load and Resistance Factors Design Based on Third-moment Transformation 125 – 131
P.-P. Li, Z.-H. Lu, and Y.-G. Zhao
- Interface Debonding Reliability of CRTS II Track Slab-CA Mortar 132 – 138
Jun Wang, Zhao-Hui Lu, Xuan-Yi Zhang, and Yan-Gang Zhao
- Updating the Reliability of Degrading Structures Based on the Method of Moments 139 – 146
Y.-T. Lu, P.-P. Li, and Y.-G. Zhao
- Time-Dependent Reliability Assessment Method for Horizontal Flexural Strength of the CRTS II Track Slab 147 – 151
Chao-Huang Cai, Zhao-Hui Lu, and Yan-Gang Zhao

MS06 Machine Learning for Uncertainty Quantification and Structural Reliability

- Physic-informed Probabilistic Analysis with Bayesian Machine Learning in Augmented Space 152 – 159
Fangqi Hong, Pengfei Wei, Jingwen Song, Matthias G.R. Faes, Marcos A. Valdebenito, and Michael Beer
- Estimation of Response Expectation Function under Hybrid Uncertainties by Parallel Bayesian Quadrature Optimization 160 – 165
C. Dang, P. Wei, M. Faes, and M. Beer
- Propagation of Imprecise Probability Descriptions via Machine Learning Based Optimization for Robust Reliability Analysis 166 – 172
A. Cicirello
- Uncertainty Quantification Over Spectral Estimation of Stochastic Processes Subject to Gapped Missing Data Using Variational Bayesian Inference 173 – 178
Yu Chen, Edoardo Patelli, Michael Beer, and Ben Edwards

MS07 Maritime Safety and Smart Shipping

- Economic Losses Assessment of China's Ports Disruption Under Typhoon-induced Extreme Wind 179 – 186
Zhenshiyi Tian, and Yi Zhang
- AIS data-based Machine Learning for Unsupervised Route Planning of Maritime Autonomous Surface, Ships 187 – 193
Huanhuan Li, Zaili Yang

MOSES Autonomous Tugboat Swarm Operation: Operational Scenarios, Requirements, and Architecture <i>Ventikos N.P., Louzis K., Themelis N., Oikonomidou H., Monios N., Mantouvalos E., Kampourakis M., Chondronasios A., Kokkorikos S., Chatzidouros E., and Kotsidis E.A.</i>	194 – 201
A Human Reliability Assessment Model for the Cognitive Process of MASS Shore-based Operator Applied, to Dynamic Probabilistic Risk Assessment Platform <i>Tengfei wang, Mihai A. Diaconeasa, Mingyang Zhang, Yantao Zhu, and Su Han</i>	202 – 209
A Systems Engineering Framework for the Safety Analysis of MASS <i>Nikolaos P. Ventikos, and Alexandros Koimtzoglou</i>	210 – 217
Risk and Reliability Analysis for MASS A Bibliometric Review of Literature from 2015 to 2021 <i>Zhihong Li, Di Zhang, Bing Han, and Chengpeng Wan</i>	218 – 225
MS08 Mini Symposium on Uncertainty-informed Asset Management	
Maintenance Decision-making for Infrastructure Systems Using, Clustering-based Cooperative Multi-Agent Deep Q-Network <i>D. Lee, J. Song</i>	226 – 230
Analysis of Inspection Records to Evaluate the Prevalence of Ageing in the UK's Industrial Asset, Base <i>C. Brown, S. Ferson, and M. de Angelis</i>	231 – 237
MS09 Model Identification and Structural Reliability Analysis with Complex and/or Combined Uncertainty for Structural Dynamic Problem under Seismic Excitation	
On the Distribution of Structural Demand in Fragility Analysis <i>Fang-Wen Geand Yan-Gang Zhao</i>	238 – 243
From "Structural Health Monitoring" to "Building Health Care" -Opportunities and Challenges- <i>Lee, Sangwon, and Itoji, Tatsuya</i>	244 – 248
Structural Identification Based on Merging Particle Filter for Earthquake Response <i>Y.Nomura</i>	249 – 256

Simulation of Design Response Compatible Acceleration Time Histories Considering the Fourier Phase Uncertainty and Their Application for Dynamic Analysis of Structure System <i>T. Sato</i>	257 – 264
Assessing Updated Seismic Performance of Existing Structures by Stochastic Model Updating <i>M. Kitahara, S. Bi, M. Broggiand M. Beer</i>	265 – 270
Seismic Resilience Assessment of Steel Frames <i>Yan-Gang Zhao, and Fang-Wen Ge</i>	271 – 276
Frequency Comparison of the Pulse-like and Non-pulse Ground Motions <i>G. Chen, Y. Liu, and M. Beer</i>	277 – 281
Effect of Column Height on the Reliability of Seismically Isolated Bridges <i>H. Matsuzaki</i>	282 – 288
Evaluation of the Effect of Bearing Deterioration on the Seismic Hazard of the Bridge <i>S. Yotsui, M. Yasuda, and K. Izuno</i>	289 – 295
MS10 Non-deterministic Model Updating and Health Monitoring with Uncertainty Treatment	
Hierarchical Bayesian Learning for Structural Damage Identification <i>Xinyu Jia, and Costas Papadimitriou</i>	296 – 300
MS11 Novel Data Science for Disaster Prevention and Resilience of Civil Infrastructures	
Multi-scale and Multi-performance Urban Monitoring Based on Data-driven Techniques <i>T. Yaoyama, T. Hida, T. Itoiand T. Takada</i>	301 – 308
Model Parameter Updating of the Seismic-Isolated Bridge Pier Using Modified TMCMC <i>T.Kitahara, M. Kitahara, and M. Beer</i>	309 – 312
Resilience Assessment of Road Network Subjected to Ground Motion and Tsunami Caused by the, Earthquake Along the Japan Trench <i>H. Ishibashi, M. Akiyamaand S. Koshimura</i>	313 – 317
Integrating Physical Prediction Methods and AI-based Satellite Data Analysis Methods, in Earthquake Damage Estimation <i>H. Ishibashi, M. Akiyamaand S. Koshimura</i>	318 – 322

Classification of Power Spectra from Data sets with High Spectral Variance for Reliability, Analysis of Dynamic Structures Marco Behrendt, Masaru Kitahara, Takeshi Kitahara, Liam Comerford, and Michael Beer	323 – 328
Synthesis of Design Ground Motion for Nonlinear Analysis with Features Identified from, Records Satisfying Specified Condition <i>Di Lin, and Riki Honda</i>	329 – 336
Improvement on Resilience of Bridge Structure by Rc column, Exhibiting Self-Centering Mechanism only During the Recovery Phase <i>K.Uemura, and Y. Takahashi</i>	337 – 344
 MS12 Optimal Structural Design under Uncertainty	
Optimal Shell Design with Polymorphic Uncertain Parameters <i>M. Fina, C. Lauff, and W. Wagner</i>	345 – 349
A Bayesian Framework for Multiobjective Optimization of Stochastic Dynamical Systems <i>H. Jensen, D. Jerez, and C. Figueroa</i>	350 – 356
Robust Multi-fidelity Optimization Approach Exploiting Data-driven, Non-linear Model Order <i>C. Czech, A. Kaps, and F. Duddeck</i>	357 – 363
Reliability of Multi story CLT Shear Wall Structure Considering Connection Uncertainty <i>John Thedy, Kuo-Wei Liao, and Sidi Mohammed Elachachi</i>	364 – 368
Estimation of First Excursion Probability in Stochastic Linear Dynamics by means of, Multidomain Line Sampling <i>M. Valdebenito, P. Wei, J. Song, M. Beer and M. Broggi</i>	369 – 372
Adaptive Surrogate Modeling Approach for Structural Optimization Under Uncertainties <i>P. Edler, S. Freitag, S. Schoen, and G. Meschke</i>	373 – 380
 MS13 Probabilistic Approaches in Geotechnical Engineering	
Reliability Assessment of Quay Walls Using Adaptive Meta-Modelling <i>T. Schweckendiek, A.P.. van den Eijnden, M. Post, A.A. Roubos, and J. de Greef</i>	381 – 386
Quantitative Risk Assessment of Rainfall-Induced Landslides Using Random Finite Element and Material Point Methods (RFE-MPM) with Hydro-Mechanical Coupling <i>X. Liu, and Y. Wang</i>	387 – 391

Optimization of LCC for Soil Improvement Using Bayesian Statistical Decision Theory <i>J. Spross, S. Hintze, and S. Larsson</i>	392 – 397
Hierarchical Bayesian Modelling for Geotechnical Parameter Derivation <i>A. Mavritsakis, T. Schweckendiek, A. M. Teixeira, and E. Smyrniou</i>	398 – 405
Bayesian Estimation for Subsurface Models using Spike-and-Slab Prior <i>T. Shuku, and K.K. Phoon</i>	406 – 409
Application of Response Surface Method for Risk Evaluation of Earth-fill Dams <i>S. Nishimura, T. Tateishi, T. Shibata, S. Kuroda, T. Kato, K. Kuribayashi, and N. Tanaya</i>	410 – 412
Using the Ensemble Data Assimilation for Stiffness Evaluation of an Embankment <i>Yuxiang Ren, Shinichi Nishimura, Toshifumi Shibata, and Takayuki Shuku</i>	413 – 418
Observation Update of Model Parameters and Limit State Probabilities of Consolidation Settlement Prediction using Data Assimilation <i>T. Nakamura, I. Yoshida and Hans T. Shuku</i>	419 – 425
Study on Autocorrelation Model for Spatial Distribution of Soil Properties using Gaussian Process Regression <i>Y. Tomizawa, I. Yoshida and Y.Otake</i>	426 – 431
Full Probabilistic Analysis with FEM for the Retaining Wall of a Deep Excavation <i>A. Ene, T. Schweckendiek and H. Popa</i>	432 – 438
Random Failure Mechanism Method in Optimal Borehole Placement for Shallow Foundation Design Under Spatially Variable Conditions <i>M. Chwala, D. J. Jerez, H. A. Jensen and M. Beer</i>	439 – 446
Probabilistic Foundation Settlement using A Hardening Soil Model on Layered and Spatially Variable Soil Teshager <i>D.K., Chwala M. and Pula W.</i>	447 – 453
3D Data-driven Site Characterization using Geotechnical Lasso with Basis Functions <i>K.K. Phoon, and T. Shuku</i>	454 – 459

MS14 Reliability Analysis and Prognostics for Complex Systems

Remaining Useful Life Estimation of units Characterized by A Bathtub-Shaped Degradation Rate in The Presence of Random Effects <i>M. Giorgio, A. Piscopo and G. Pulcini</i>	460 – 467
--	-----------

Understanding the Impact of the Operational Faults on Building Energy Performance <i>Ashraf Alghanmi, Akilu Yunusa-Kaltungo and Rodger Edwards</i>	468 – 474
A New Method on System Reliability Analysis based on Survival Signature Theory <i>Yide Zheng, Yi Zhang and Jiarui Lin</i>	475 – 482
Spatio-temporal Monitoring of Image Degradation for Manufacturing Process <i>Munwon Lim and Suk Joo Bae</i>	483 – 484

MS15 Reliability Analysis under Aleatoric and Epistemic Uncertainty

Effect of Vertical Seismic on Dynamic Reliability Analysis of 2D Slopes Considering the Spatial Variability of Soil Parameters <i>Yichuan Li, Rui Pang and Bin Xu</i>	485 – 489
Interval-Valued Probabilities: Reasons and Benefits of Application to Human Cognitive Reliability Model <i>V. Krymsky, N. Solodilova and F. Akhmedzhanov</i>	490 – 497
Bounding Failure Probabilities in Imprecise Stochastic FE models <i>Matthias G. R. Faes, Marc Fina, Marcos A. Valdebenito, Celine Lauff, Werner Wagner, Steffen Freitag and Michael Beer</i>	498 – 501
Estimation of Second-order Statistics of Buckling Loads Applying Linear and Nonlinear Analysis <i>Marc Fina, Matthias G. R. Faes, Marcos A. Valdebenito, Werner Wagner, Matteo Broggi, Michael Beer and Steffen Freitag</i>	502 – 507
Random-interval Hybrid Reliability Analysis by a Parallel Active Learning Kriging Method with a Pseudo Weighted Expected Risk Function <i>J. Liu, C. Dang and M. Beer</i>	508 – 514

MS16 Reliability and Resilience of Critical Infrastructure Systems and Networks

Use of Generalized Lambda Models For Seismic Fragility Analysis <i>X. Zhu, M. Broccardo and B. Sudret</i>	515 – 521
Evaluation of Relative Importance of Network Components by System-reliability-based Disaster Resilience Analysis <i>Y. Kwon and J. Song</i>	522 – 529
Resilience Decision-Making for Complex and Substructured Systems <i>J. Salomon, J. Behrensdoerf, N. Winnewisser, M. Broggi and M. Beer</i>	530 – 537

- Active Learning for System Reliability Analysis Using PC-Kriging, Subset Simulation and Sensitivity Analysis 538 – 545
P. Parisi, M. Moustapha, S. Marelli and B. Sudret

MS17 Resilience and Reliability Modelling of Critical Assets in the Age of Disasters & Pandemics

- A Resilience-based Asset Management Strategy Approach Using the Analytical Hierarchy Process 546 – 553
A. Karar, A. Labib and D. Jones

- Development of a Framework for Implementing Asset Register Solutions 554 – 559
L. English and A. Yunusa-Kaltungo

- An Analysis of the Practicality of Implementing Asset Management Systems in the Context of a Complex Cultural Environment 560 – 567
G. Rivera, A. Yunusa-Kaltungo, R.M. Jungudo, B. Ali-Gombe and L. English

- Preliminary Exploration of Recursive Feature Elimination and Empirical Decomposition for Building Energy Consumption Prediction 568 – 573
Qingyao Qiao, Akilu Yunusa-Kaltungo and Rodger Edwards

- Reliability Assessment and Optimal Maintenance Scheduling of a Photovoltaic System: A Nigerian Case Study 574 – 578
Aisha Sa'ad, Aime Nyongue, Zied Hajej, Akilu Yunusa-Kaltungo and Cyril Amaghionyeodiwe

MS18 Resilience Modeling for Risk-Informed Decision Support

- Interdependent Households-Buildings-Networks Community-Level Post-Hazard Functionality Assessment Methodology 579 – 585
Omar M. Nofal, Nathanael Rosenheim, Jayant Patil, Xiangnan Zhou, John W. van de Lindt, Leonardo Duenas-Osorio, and Eun Jeong Cha

- Gaussian Process-based Optimization Framework for Community Building Portfolios Considering Resilience and Sustainability Objectives 586 – 591
G.A. Anwar and Y. Dong

- Comparative Retrofit Prioritization Schemes for Electric Power Networks: Application to the community in Seaside, OR 592 – 599
A. L. Beck, H. Talebiyan, E. J. Cha and L. Duenas-Osorio

- Reliability Analysis of Landslides based on the Random Finite Element Method 600 – 605
Chengxin. Feng, Matteo. Broggi and Michael. Beer

MS19 Risk-based Damage Assessment and Prediction of Infrastructure Systems Subjected to Natural Hazards

- An Explicit Approach to Estimating Cumulative Tropical Cyclone Damage 606 – 613
Cao Wang and Hao Zhang
- Regression-based Estimation of Uncertainties in Engineering Demand Parameters of Building Structures for Regional Seismic Loss Assessment 614 – 620
C. Kang, O. Kwon and J. Song
- Multi-Hazard Power Resilience Modelling using Synthetically Generated Distribution Networks 621 – 628
C.Zhai, J. P. S. Chhabra, Y. Kim, S. D. Guikema and S. Patel
- Simulation and Risk Evaluation of Possible Superstorms Hitting Europe's North Sea Coast 629 – 634
Y. Sun, M. Bittner, Y. Zhang and M. Beer
- Practical Method for Estimating Acceleration Fourier Amplitude Spectrum at an Arbitrary Point 635 – 639
M. Sugai, Y. Mori and Y. Mizutani

MS20 Risk-informed Digital Twins of Buildings, Bridges, Offshore Structures: Frameworks, Methods, and Tools

- Sourcing Uncertainty Data by Perception, Experience and Opinion—Methods and Procedures, Advantages and Challenges 640 – 647
J. Mohammadi
- An Open-source Digital Twin Operational Platform for the Transparent Management of Information 648 – 653
Matthew Bonney, Marco de Angelis, Mattia Dal Borgo and David Wagg
- Feature-oriented Digital Twins for Life Cycle Phases Using the Example of Reliable Museum Analytics 654 – 661
W. Luther, E. Auer, D. Sacher and N. Baloian
- Utility of Information (UoI) for Probabilistic Fatigue Monitoring 662 – 666
U. Alibrandi, G. Du, S.D.R. Amador and R. Brincker
- Quantum-like Uncertainty Quantification (QUQ) for Urban Sustainability and Resilience 667 – 676
U. Alibrandi, E. Zio and K.M. Mosalam

MS21 Stochastic Finite Element Methods and their Applications on Model Updating

- A New Homotopy Approach for Stochastic Static Model Updating with Large Uncertain Measurement Errors 677 – 683
Zhifeng Wu, Bin Huang, Jian Fan and Kaiyi Xue
- Homotopy Stochastic Residual Error Method for Structural Elastic Stability Analysis 684 – 691
Heng Zhang and Bin Huang
- A New Method for the Response of A Random Plate 692 – 694
Yejun Li and B. Huang
- A Sparse Grid Stochastic Collocation Method for Structural Reliability Analysis 695 – 697
J. He, Y.-H. Duan and M.-J. Wang
- A New Stochastic Model Updating Method Based on Improved Cross-Model Cross-Mode Technique 698 – 703
Hui Chen and Bin Huang

MS23 Reliability and Maintenance for Internet of Things and 5G+ Networks

- Defending from Supply Chain Attacks 704 – 709
Fabrizio Baiardi
- Development and Application of A Cyber-Physical System Resilience Assessment Framework 710 – 718
B. Cassottana and G. Sansavini
- Modeling the System-Level Reliability towards a Convergence of Communication, Computing and Control 719 – 723
Bin Han and Hans D. Schotten

GS01 Structural Reliability

- Fire Resistance of Simple Steel Beam-Probability-Based Approach to Evaluation 724 – 729
M. Maslak
- The Fatigue Cumulative Damage and Reliability Analysis of Subway Bogie Structure Based on the Duration of Stochastic Process Exceeding Threshold 730 – 735
Zhenhao Zhang, Mengmeng Tao, Wenbiao Li, and Hesheng Li
- The Proposed Rank-based Active Learning Kriging for Efficient Structural Reliability Analysis Using Weighted Average Simulation Method 736 – 743
K. Sharifi-Nik, H. Ghohani-Arab, M. Rashki, and MGR. Faes

GS03 Risk Assessment and Management

- Achieving Visibility and Efficiency in Reliability Management by Integrating RAM Analysis with Modern IoT Platform 744 – 749
Miikka Tammi, Tatu Pekkarinen, and Veli-Pekka Salo
- Probability Distribution of Vibration Isolation Area in Phonon Crystal Arrays with Finite Length 750 – 754
Xiaolei Li, Xuhong Zhou, and Yongtao Bai
- Dempster-Shafer Theory Based Uncertainty Models for Assessing Hereditary, BRCA1/2-Related Cancer Risk 755 – 762
E. Auer, and W. Luther
- A Framework for Airport Functional Downtime Estimation due to Structural Impacts under Natural Hazards 763 – 770
Jaskanwal P. S. Chhabra, Ph.D., Zhengxiang Yi, Ph.D., Youngsuk Kim, Ph.D., Deepak R. Pant, Ph.D., Greg Brunelle, M.S., M.A., and Shabaz Patel, M.S.
- Approximation Representation of Observed Strong Ground Motion Distribution using Mode Synthesis of Predicted Distributions. 771 – 778
Y. Takahashi, and N. Nojima
- A Practical Framework for Evaluating the Seismic Resilience of Ports 779 – 784
D. R. Pant, Y. Kim, J. P. S. Chhabra, and S. Patel
- Oil spill preparedness: Modelling Challenges and Implications for Decision-making 785 – 792
E.P. Ford, H.P. Lohne, and J.T. Selvik

GS05 Design under Uncertainty

- The Log-Rayleigh Distribution for Local Maxima of spectrally Represented Log-normal Processes 763 – 770
Jan Grashorn, Marius Bittner, Cao Wang, and Michael Beer

GS06 Prognostics and Maintenance

- Impact on Performances of a Condition-based Maintenance Policy of Misspecification of Gamma with Inverse Gaussian Degradation Process 771 – 778
Nicola Esposito, Bruno Castanier, Massimiliano Giorgio
- An Ontology for an Epigenetics Approach to Prognostics and Health Management 779 – 784
A. Ruvinsky, M. Seale, C. Salter, and N. Garcia-Reyero

GS07 Health Monitoring and System Identification

Identification of Material Parameters from Full-Field Displacement Data Using
Physics-Informed Neural Networks 813 – 820
D. Anton, and H. Wessels

GS014 Other Topics

Function-oriented Seismic Performance Assessment of Complex Systems 821 – 825
Zuo Haopeng, Shang Qingxue, Li Jichao, and Wang Tao
Author Index 827-830
